## PRONK TECHNOLOGIES

### BMET Pack Pro

**P**ronk Technologies has introduced the BMET Pack Pro, a compact pack that holds all the Pronk products, accessories and extra space for tools. Simulators (SimCube NIBP, OxSim SpO2, SimSlim Multi-parameter), the new Safe-T Sim Automated Safety Analyzer, and multi-function FlowTrax IV Pump Analyzer all fit within the customized padded compartments to make it easier than ever to travel with all your test equipment between hospitals and clinics. The BMET Pack Pro also includes a padded compartment which holds up to a 15.6-inch laptop/tablet (not included) secure. The compact size of Pronk test equipment combined with an easily transported pack offers maximum mobility and versatility to biomedical engineers. ⚙️
